VARISH KHAN

Full Stack Developer · M.Tech AI/ML · Java & Python Instructor

Bhopal, MP | +91 91715 67434 | varishkhan2002@gmail.com | linkedin.com/in/varish-khan | varishkhan.github.io/portfolio

PROFESSIONAL SUMMARY

Full Stack Developer and M.Tech AI/ML candidate with active industry experience building production web applications at Venique IT Solution and prior teaching experience at FXT Institute. Proficient in Java (Spring Boot), Python, and REST API development with a growing focus on AI integration and intelligent system design. Combines solid software engineering practice with hands-on AI/ML research through academic thesis work.

EXPERIENCE

Full Stack Developer May 2025 – Present

Venique IT Solution, Mandideep, Bhopal · venique.org

- Building and maintaining full stack web applications using React.js, Node.js, and Python for real clients across multiple domains.
- Designing RESTful backend APIs and contributing to SaaS product architecture as a founding team developer.
- Developing AI & automation features including chatbots and ML-based solutions for client-facing products.

Java & Python Instructor March 2024 – April 2025

FXT Institute, Bhopal

- Taught Python fundamentals and Java Full Stack development (Spring Boot, JDBC, REST APIs) through a project-based curriculum.
- Mentored students in OOP, DSA, and database design — bridging theory with real-world backend development.

TECHNICAL SKILLS

Languages	Java (Core / Advanced), Python, C++, SQL, JavaScript
Backend	Spring Boot, RESTful APIs, Flask, Servlets, JDBC, Microservices
Frontend	React.js, HTML, CSS, JavaScript
Databases	MySQL, MongoDB
AI / ML	Pandas, NumPy, Scikit-learn, MediaPipe, LSTM, CNN, GenAI API Integration
Tools	Git, GitHub, Maven, Postman, Docker, VS Code, GitHub Copilot
Core	Data Structures & Algorithms, OOP, System Design, SDLC

Currently deepening expertise in Generative AI, Prompt Engineering, and ML applications — applied through M.Tech research and ongoing project work.

PROJECTS

Real-Time Contactless HCI System — *M.Tech Thesis* *Python · MediaPipe · LSTM · CNN*

- Designed a real-time hand gesture recognition system using MediaPipe landmark detection and LSTM/CNN architectures for contactless human-computer interaction.

- Optimized the deep learning inference pipeline for real-time performance, achieving high gesture classification accuracy across varied conditions.

JobBot — AI-Powered Interview Assistant *Spring Boot · React.js · Flask · MySQL*

- Engineered a full-stack microservices app with a Flask-based AI resume scanner providing real-time keyword scoring against job descriptions.
- Bridged React frontend, Spring Boot backend, and Python AI service via REST APIs — resolving CORS challenges across distributed servers.

Student Management System *Java · JDBC · MySQL · JUnit*

- Designed a normalized MySQL schema and optimized SQL queries with indexing, achieving a 30% improvement in query performance for large datasets.
- Validated reliability through JUnit test cases covering student record management edge cases.

EDUCATION

M.Tech — Artificial Intelligence & Machine Learning 2024 – 2026
Oriental Institute of Science and Technology, Bhopal

B.E. — Computer Science & Engineering 2019 – 2023 | CGPA: 8.41
Rabindranath Tagore University, Bhopal

CERTIFICATIONS & ACHIEVEMENTS

- **Java & DSA** — Backend optimization and algorithm design.
- **Git & GitHub** — Version control and collaboration.
- **LeetCode** — Active DSA problem solver focused on algorithms and backend performance
